

Throughout, the set satisfying the condition given is the union of any shaded regions, any solid lines, and any black-filled points. Dashed lines and open points are outside the region. A and B will be gray-filled at times when they fit the condition vacuously (because the operative angle at that point doesn't exist.)

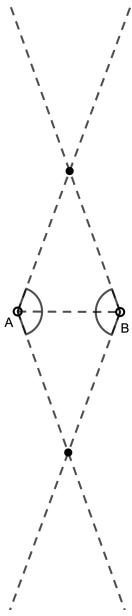

$$1. \angle A^\circ \geq 70^\circ$$

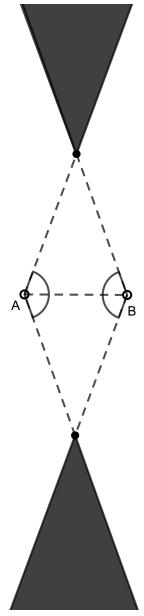

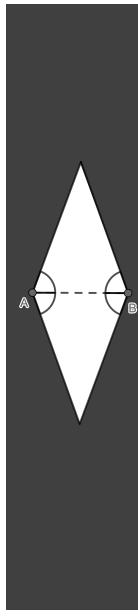

$$2. (\angle A^\circ = 70^\circ) \wedge (\angle B^\circ \geq 70^\circ)$$

$$3. (\angle A^\circ = 70^\circ) \vee (\angle B^\circ = 70^\circ)$$

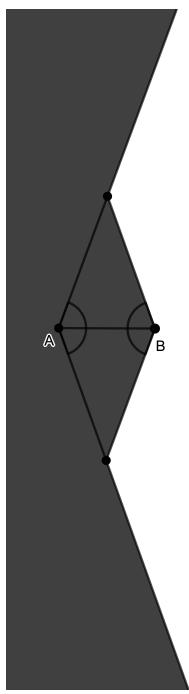

$$4. (\angle A^\circ = 70^\circ) \wedge (\angle B^\circ = 70^\circ)$$

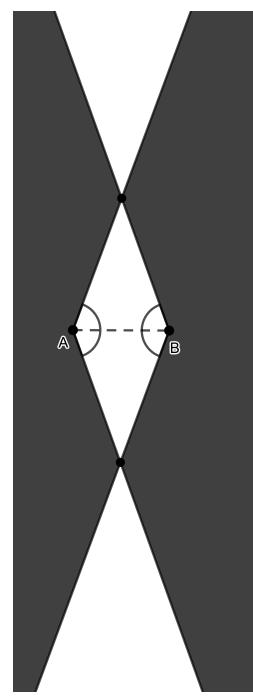

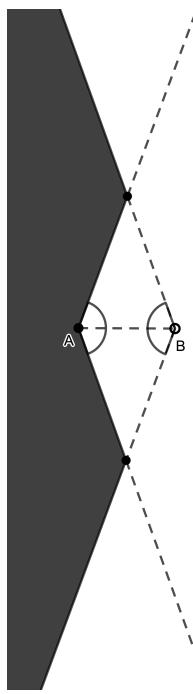

$$5. (\angle A^\circ \geq 70^\circ) \vee (\angle B^\circ \geq 70^\circ)$$

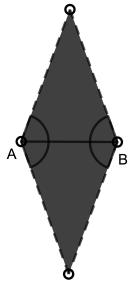

$$6. (\angle A^\circ \geq 70^\circ) \wedge (\angle B^\circ \geq 70^\circ)$$

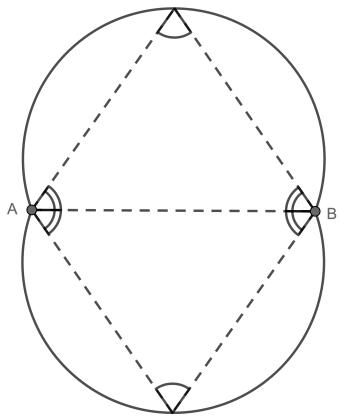

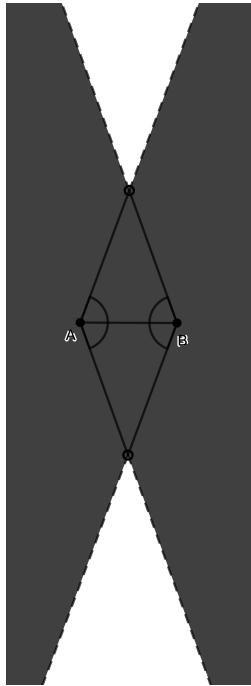

7. $(\angle A^\circ \geq 70^\circ) \vee (\angle B^\circ \leq 70^\circ)$ 8. $(\angle A^\circ \geq 70^\circ) \wedge (\angle B^\circ \leq 70^\circ)$ $(\angle B^\circ \leq 70^\circ)] \vee [(\angle A^\circ \leq 70^\circ) \wedge (\angle B^\circ \geq 70^\circ)$

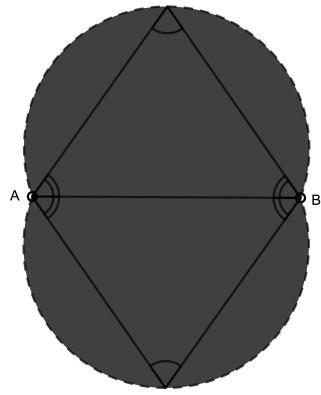

9. $[(\angle A^\circ \geq 70^\circ) \wedge$
 $(\angle B^\circ \leq 70^\circ)] \vee [(\angle A^\circ \leq 70^\circ) \wedge (\angle B^\circ \geq 70^\circ)$

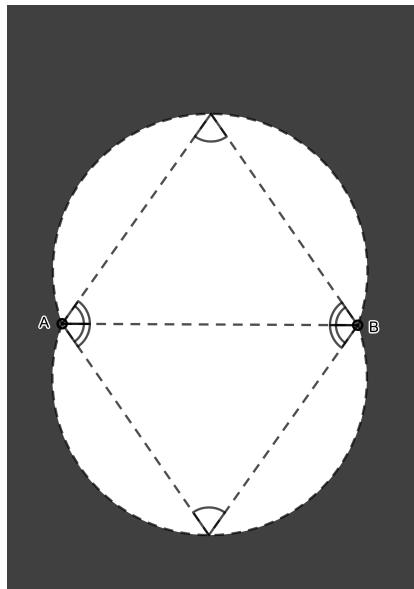

10. $(\angle A^\circ < 70^\circ) \wedge (\angle B^\circ < 70^\circ)$ 11. $(\angle A^\circ < 70^\circ) \vee (\angle B^\circ < 70^\circ)$

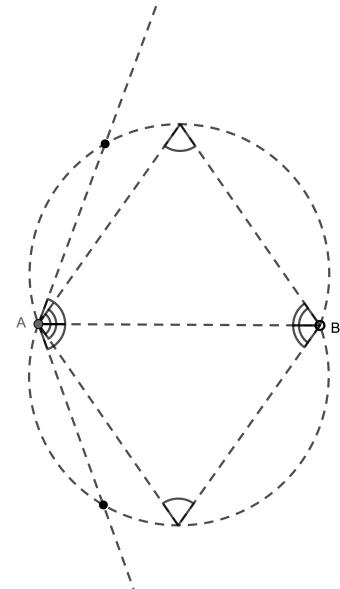

12. $\angle C^\circ = 70^\circ$

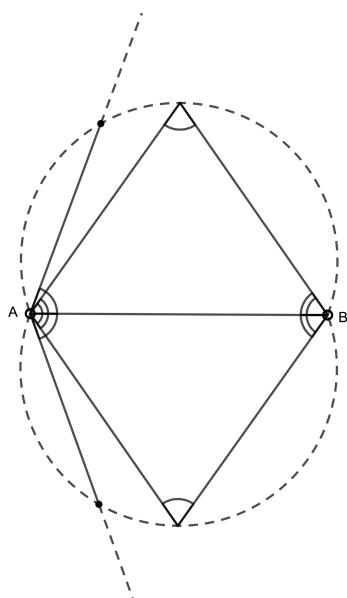

13. $\angle C^\circ > 70^\circ$

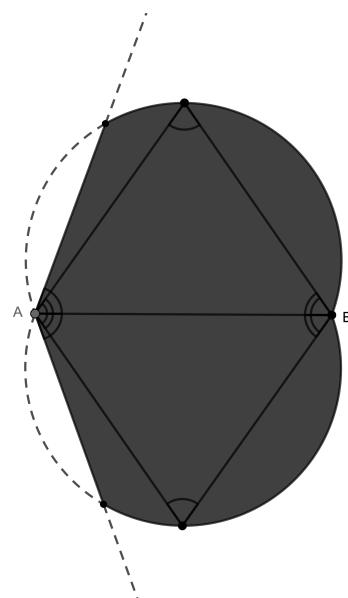

14. $\angle C^\circ < 70^\circ$

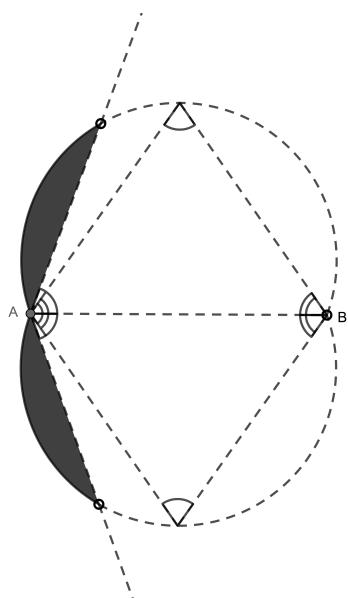

15. $(\angle A^\circ = 70^\circ) \wedge (\angle C^\circ = 70^\circ)$

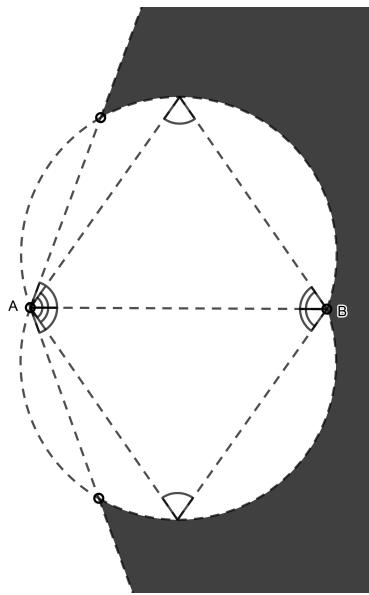

16. $(\angle A^\circ = 70^\circ) \wedge (\angle C^\circ \geq 70^\circ)$

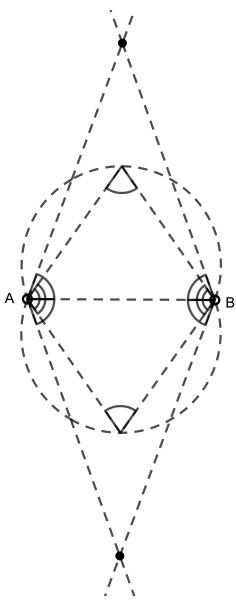

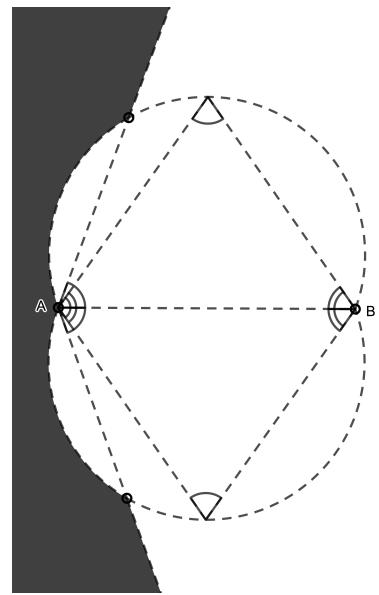

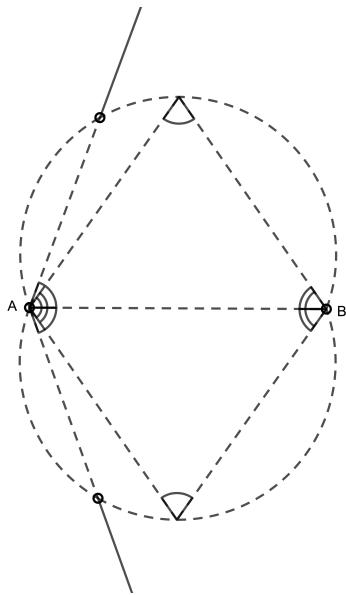

17. $(\angle A^\circ \leq 70^\circ) \wedge (\angle C^\circ \geq 70^\circ)$

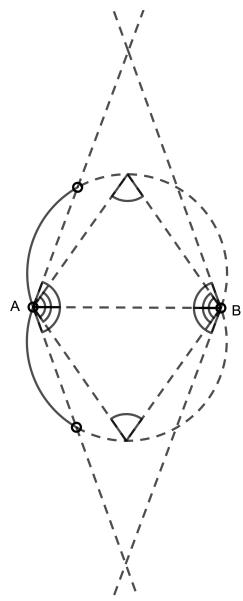

18. $(\angle A^\circ > 70^\circ) \wedge (\angle C^\circ \geq 70^\circ)$

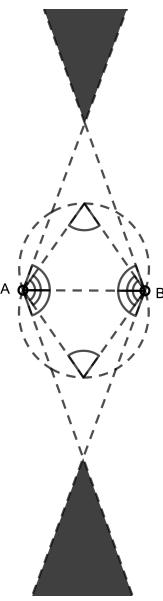

19. $(\angle A^\circ < 70^\circ) \wedge (\angle C^\circ < 70^\circ)$ 20. $(\angle A^\circ = 70^\circ) \wedge (\angle C^\circ < 70^\circ)$ 21. $(\angle A^\circ > 70^\circ) \wedge (\angle C^\circ < 70^\circ)$

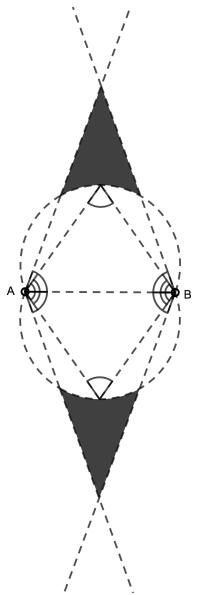

22. $(\angle A^\circ = 70^\circ) \wedge$
 $(\angle B^\circ = 70^\circ) \wedge (\angle C^\circ < 70^\circ)$

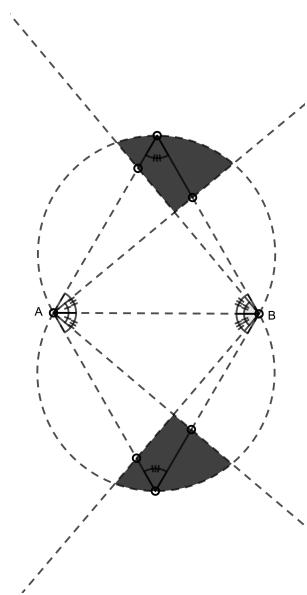

23. $(\angle A^\circ > 70^\circ) \wedge$
 $(\angle B^\circ < 70^\circ) \wedge (\angle C^\circ = 70^\circ)$

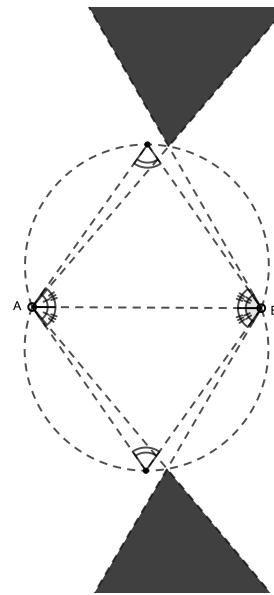

24. $(\angle A^\circ > 70^\circ) \wedge$
 $(\angle B^\circ > 70^\circ) \wedge (\angle C^\circ < 70^\circ)$

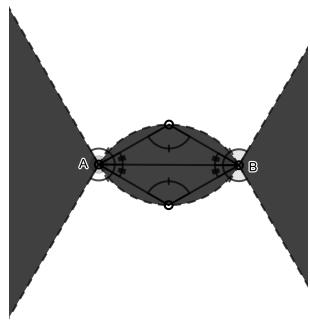

25. $(\angle A^\circ < 70^\circ) \wedge$
 $(\angle B^\circ < 70^\circ) \wedge (\angle C^\circ < 70^\circ)$

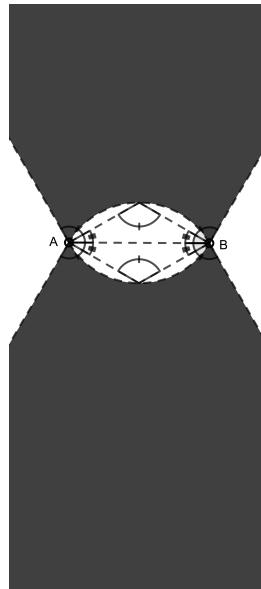

26. $(\angle A^\circ > 40^\circ) \wedge$
 $(\angle B^\circ > 50^\circ) \wedge (\angle C^\circ > 60^\circ)$

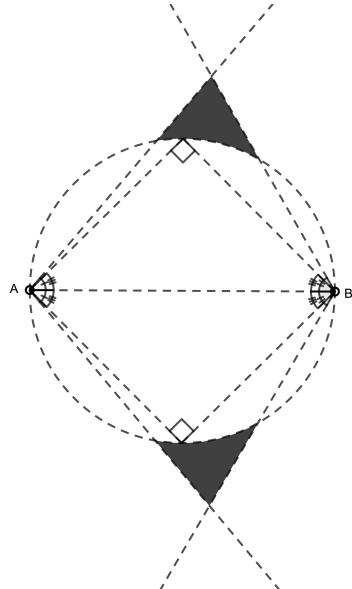

27. $(\angle A^\circ > 50^\circ) \wedge$
 $(\angle B^\circ > 60^\circ) \wedge (\angle C^\circ < 70^\circ)$

28. $\triangle ABC$ has an angle mea-
suring more than 120° .

29. $\triangle ABC$ has no angle mea-
suring as much as 120° .

30. $\angle A^\circ < 50^\circ, \angle B^\circ < 60^\circ$,
and $\triangle ABC$ is acute.
